Summary

I am pursuing a BSc in Computer Science, applying lessons from my multimedia and web development training. During my internship at NordInsight, I worked with ReactJS, NodeJS, and MongoDB to create real-time data flows for medical tools. This setting taught me to rely on swift feedback loops for reliable outcomes. I integrated TypeScript, Axios, and AWS to uphold code consistency. I aim to merge theory with hands-on projects, delivering tangible results in evolving tech spaces.

I led technology upgrades at a dental clinic, introducing resin 3D printing and 3Shape scanning for quicker, precise procedures. My role involved budgeting, staff training, and system oversight. Managing bar operations sharpened my resource tracking and vendor negotiation. I explored new ways to trim overhead without harming quality. Now, I share insights on tech and finance through my blog, turning complex topics into direct conversations for a curious audience, encouraging broader engagement.

Education

BSc. in Computer Science

University of London, UK 

Oct. 2024 - present

AP in Multimedia, Web Design-Development & Video Game Development

Vocational Institute of Rethymno, GR 

Oct. 2022 - July 2024

Work Experience

Soho House & Co

Bartender

Sep 2024 - present

København, DK

- Leveraged my hospitality background to secure a position at a prestigious members' club while pursuing academic studies.
- Provide exceptional service to high-profile clientele, maintaining the establishment's premium standards.
- Create networking opportunities within Copenhagen's entrepreneurial community.

NordInsight

Full Stack Developer (internship)

June 2024 - Oct. 2024

København, DK

- Secured position to transition into the Nordic technology market while leveraging full-stack development skills, obtained by my vocational training.
- Developed admin interfaces for radiologist implant approval workflows using ReactJS, NodeJS, and MongoDB.
- Implemented commenting functionality on implant records to enhance collaboration between medical professionals.
- Engineered real-time notification system using Amazon SES within AWS cloud infrastructure.
- Utilized TypeScript, Axios for API handling, Redux for state management and Git for version control to maintain code quality and deployment consistency.

Creta Dental

Technology Project Manager & IT Support

Sep 2023 - Aug 2024

Crete, GR

- Secured government grants and managed technology modernization projects across the clinic.
- Set up a resin 3D printing farm that allowed dental technicians to create prosthetics faster, with higher precision, and at reduced material cost.

- Upgraded dental workflow with 3Shape 3D scanners and software, optimizing digital impression capture and processing.
- Co-developed and deployed a dental implant inventory system to track supplies and reduce ordering errors.
- Developed a new company website to improve online presence, appointment scheduling and patient communication.

Airborne Infantry Battalion - Hellenic Army
IT Support Helpdesk

Mar 2021 - Feb 2022
Crete, GR

- Secured position during mandatory military service after demonstrating strong interest in the technology sector.
- Maintained operational readiness of critical communication systems and technology infrastructure during exercises.
- Provided technical support and troubleshooting for hardware, software, and connectivity issues across the battalion.
- Organised a detailed documentation system for tracking support requests, incident resolution, and recurring issues.

Bonobo Bar & more
Operations Manager

Mar. 2018 - Sep. 2023
Crete, GR

- Managed budgets, conducted financial analysis, and implemented cost-control measures to increase profitability.
- Oversaw inventory management, negotiated with vendors, and optimized supply chain to reduce costs while maintaining the highest quality standards in the area.
- Streamlined daily operations and staff scheduling to improve service efficiency and reduce wait times.
- Recruited, trained, and developed staff in spirits knowledge, drinks preparation, and customer service.
- Organized themed events, special promotions, and business partnerships to enhance customer engagement and bar visibility.

(Additional working experience excluded to maintain focus)

Specializations

Data Science, IBM 

Mar 2024

IT Support Professional Certificate, Google 

Jul 2024

Full Stack Software Developer, IBM 

Oct 2023

Additional Information

Tech & Finance Commentator
The Digital Shift 

Jan 2024

I am building a blog where I share insights on technology and financial news. My goal is to simplify complex topics, spark discussions, and engage with a wider audience interested in discussing noteworthy events.
